

19x15" Undermount Sink

SKU: SNK-19U

NOTES

DISCLAIMER

We recommend adding a 1/4" (.25) to the inner dimension to ensure the unit fits properly in the build out.

For Reveal Mount:

Use the outside line for the cut. The sink rim should be revealed by 1/4 inch from the edge of the countertop opening.

For Flush Mount:

Use the inside line for the cut. The sink wall should be flush with the edge of the countertop opening.

Important:

Always check the physical template against the actual sink unit for the most accurate cut.
