Controls

eFIRE mobile app

Providing a more connected and convenient experience by controlling every setting right from your mobile device. This includes: on/off, flame height and blower speed, top light and more!

Included remote

Enhanced full-function remote controls every function of your fireplace including on/off, thermostat, flame, top lights, and blower speed.

Optional heat management

Universal Heat Management® (UHM)

This system operates electricity-free and without blowers, utilizing a set of ducts to efficiently circulate heat throughout the room, rather than blowing it directly from the front of the fireplace. Additionally, the (UHM) system lowers clearances for combustibles and enables the safe installation of electronics above the fireplace.

Hot air distribution kit (LHAD)

Efficiently moves warm air from the fireplace to a different room or outdoors using flexible ducting.

Innovations

Battery back-up control

In the event of a loss of power, your fireplace will still light and keep you warm—requires 4 AA batteries (not included).

Direct vent

Effectively removes exhaust and fumes from your space, keeping your indoor air clean while also conserving energy.
