

Intrepid FlexBurn in Twilight enamel

Intrepid

Compact and efficient, the Intrepid wood stove offers the classic warmth and timeless beauty, now with the convenience of FlexBurn Technology. The style and strength of 100% cast iron construction, combined with features not found often on stoves of this size, put the Intrepid FlexBurn in a class of its own. When paired with the optional catalytic performance pack, it becomes the cleanest burning wood stove ever certified by the EPA.

Timeless cast iron styling with a furniture-quality finish

Convenient top load keeps smoke and ash contained and increases load capacity

Exclusive swing-out ash pan allows you to cleanly remove ashes, even when the stove is hot

Cast iron griddle top offers a versatile cooking surface for the stovetop chef

Peak BTU/hr Output ¹	37,000
Heating Capacity ²	600 - 1,800 sq ft
Maximum Burn Time	8 hrs
Efficiency	LHV: 83% (Catalytic) 80% (Non-Catalytic) HHV: 77% (Catalytic) 74% (Non-Catalytic)
Emissions	0.3 g/hr (Catalytic) 0.6 g/hr (Non-Catalytic)
Firebox Capacity	1.31 cu ft
Recommended Log Length	14"
Actual Weight	348 lbs

FlexBurn® Technology

Save money and use less wood with a catalyst Increase your heating efficiency and lower your stove emissions, ensuring you get the most out of each load of wood.

START UP

Primary burn started and fueled by fresh air with the bypass damper open

2-STAGE BURN

Damper is closed once stove and flue are sufficiently hot, forcing smoke into the secondary combustion chamber where additional air feeds combustion of gases for secondary burn

3-STAGE BURN

With catalyst in place, increased efficiency and lower emissions result from a tertiary burning of gases and CO, and enables combustion at much lower temperatures, extending burn times and saving on fuel costs

Specifications

6" single or double wall pipe	CLEARANCES TO COMBUSTIBLES		
	A	B	C
Top exit, single wall pipe	15" (381 mm)	12" (305 mm)	6-1/2" (165mm)
Top exit, double wall pipe	11" (279 mm)	10" (254 mm)	6" (152 mm)
Rear exit	15" (381 mm)	13" (330 mm)	N/A

Standard floor protection: 39-1/4" x 44" minimum. See manual for corner floor protection sizes and diagrams, for single and double wall pipe. Refer to manual for complete list of clearances prior to installation.

1: BTU/hr output: 1st hour output uses high burn efficiency number. BTU/hr output will vary depending on the type of fuel used and moisture content of the fuel. 2: See your local Vermont Castings authorized dealer for help in determining the product that best suits your heating needs based on climate and home efficiency.

IMPORTANT - READ BEFORE YOU INSTALL! Refer to the Owner/Installation Manual for complete clearance requirements and specifications. The images and descriptions in this brochure are provided to assist you in product selection only. Vermont Castings is a registered trademark of Hearth & Home Technologies. Product specifications and pricing subject to change without notice. Fireplace, stove and insert surfaces get extremely HOT and can cause burns if touched. Keep a safe distance away.
