

TALL LINEAR VECTOR WITH LUMINOUS LOGS

TLV50L | TLV62L | TLV74L | Direct vent gas fireplaces

Where innovation reigns supreme. Experience ultimate realism with our Tall Linear Vector with Luminous Logs gas fireplace. Its cutting-edge design brings you lifelike flames emerging directly from the logs, while the modulating ember bed delivers realistic effects without sacrificing efficiency. Offering the ability to control how much fuel and heat with ease for full four season usage. Elevate your living space with our Tall Linear Vector with Luminous Logs, offering the peak of realism, innovation and luxury.

Features

- Luminous Logs technology where flames emanate directly from the logs
- Customize heat and ambiance with four flame and light settings: high flame, low flame, ember bed lighting and top lighting
- Modulating electric LED ember bed
- Expansive viewing area and tall flames for a focal point that demands attention
- See-through models available
- Includes top lights for an illuminated effect
- Easier installation with no power venting required for natural gas
- Perfect for larger rooms and commercial spaces
- Up to 48,000 BTUs
- Warranty: President's Limited Lifetime
- Available sizes: 50", 62", 74"

Customize

Media (must choose one):

Oak logs with woodland kit

Driftwood logs with woodland kit

Birch logs with woodland media kit

Decorative panel:

MIRRO-FLAME[®] porcelain reflective radiant panels included

Included surround:

Adjustable finishing flange for modern frameless appearance

Optional trim:

Adjustable 4pc 5/8" finishing trim for installations that require more coverage

FIREPLACE DESIGN STUDIO

Included controls

eFIRE mobile app

Providing a more connected and convenient experience by controlling every setting right from your mobile device. This includes: on/off, flame height and ember bed.

Remote

Enjoy added convenience with the included remote – control every function of your fireplace from the comfort of your couch.

Optional heat management

Dynamic Heat Control (DHC)

Enhance performance and lower wall temperatures. This system works without a fan for quieter operation and is perfect for situations where heat-sensitive objects, like a wall-mounted TV, need to be placed directly above the fireplace and recessed. It offers the lowest height clearances for TV or artwork installations.

Dynamic Heat Control Plus (DHC+)

Add this system to your DHC to move the heat to the outdoors.

Ducted heat management (DHM)

Offers the greatest amount of flexibility for installations with multiple configurations available, including an option where you can install the fireplace as a room divider and safely pass cables through the wall for ease of electronic installation. Enjoy true zero clearance to combustible materials without fear of heat damage.

Hot air distribution kit (LHAD)

Efficiently moves warm air from the fireplace to a different room or outdoors using flexible ducting.

Innovations

Luminous logs

With advanced burner technology and careful engineering, the flames dance and flicker just like a traditional wood-burning fire, right from the log.

Modulating electric LED ember bed

The modulating ember bed pulses like the embers of a wood fire, further enhancing the authenticity.

More efficient use of gas

This innovative design offers greater impact and efficiencies (increased flames without the added fuel consumption). Napoleon recognizes the global shift towards environmentally-friendly solutions and is dedicated to offering sustainable products and practices.

Direct vent

Effectively removes exhaust and fumes from your space, keeping your indoor air clean while also conserving energy.
